Clover Global Solutions launches clearinghouse for Health, Safety and Environment

Houston, TX, March 2, 2006 – Clover Global Solutions LP, the industry leader in providing contingent workforce employment and 1099 compliance solutions to Fortune 100 companies, today announces the launch of an online collaborative community for HSE trainers, subject matter experts, other contingent HSE professionals and hiring organizations: www.CloverHSE.com.

Over the past 6 years, Clover has built a strong base of consulting personnel who assist in meeting the HSE challenges within the Upstream and Process industry market sectors. Clover has been asked by their Clients, industry Consultants and HSE representatives within their customer base to expand their services focusing upon these HSE challenges.

Clover's objective is to provide the right business infrastructure for Operators, current Employees and Clover alliance partners to participate in a collaborative community to deliver sustainable HSE results. This community's objective is to foster a premier international consulting resource providing a full range of management and technical consulting, training services, and software products to assist companies within both the Oil & Gas and Petrochemical Industries.

Current features of the online collaborative community include Discussion Forums, customizable Training Modules and Quizzes. Future offerings will include Fit for Duty and Offshore Facility Wellness Programs, Human Error & Reliability Analysis, Risk Communication/Crisis Management Expert Witness Testimony and the ability to author training/administer testing for its Members.

Sourcing contractors to provide HSE professionals has now become a core function for Fortune 100 firm's Services Procurement or Human Resources organizations. Key success criteria for these organizations will be to ensure that the contractors hired are qualified and not exposing their company to easily avoidable risk and liability, while significantly reducing costs. "In today's turbulent economic environment companies are increasingly leveraging the variable cost associated with a flexible workforce. The smart companies are now learning how to engage these workers most cost effectively, and without risk," said Carolyn J. Ortega-Sutton, President of Clover Global Solutions. "Today we are announcing the availability of resources and tools that will enable hiring organizations to identify and source contingent HSE professionals on-demand through this clearinghouse."

###

About Clover Global Solutions

Clover Global Solutions LP (www.clovergs.com) is the leading provider of contingent workforce employment, management and web-enabled 1099 compliance solutions to energy sector companies that are seeking an integrated, cost-effective approach to the engagement, management and administration of their contingent workforce.
