Oil spill net profits donated by Clover to National Fish and Wildlife Foundation.

Houston, TX – July 13, 2010 – Clover Global Solutions has entered into an agreement with the [National Fish and Wildlife Foundation](#), whereby Clover Global Solutions will donate proceeds from net profits for the placement of technical and professional personnel supporting the Deepwater Horizon incident. Funds donated to the National Fish and Wildlife Foundation will be used for conservation projects in the Gulf of Mexico region to save wildlife due to the Deepwater Horizon oil spill.

“As a diver having spent untold hours photographing sea life and witnessing sea turtle hatching success in Cozumel Mexico it makes this an easy decision. All these delicate creatures will need a serious amount of help. Profiting from the spill just didn’t feel right,” said Chris Sutton, Clover Partner.
